Administration**

Construction Activities and Upcoming Work

This week, Interwest Construction, Inc. (ICI) continued delivering material for Engineered Log Jam (ELJ) construction. ICI installed new prestressed bridge girders at Tower Creek on Monday. The rest of the week was spent installing temporary fall protection rails, welding the girders together and setting up form work for end wall concrete pour. Next week they will continue setting up form work and installing rebar in preparation for pouring concrete end walls at each abutment. Traffic is diverted to a single lane at Tower Creek with an automated traffic signal running 24/7. Please be cautious and aware over the next few weeks, there will be heavy truck traffic on Upper Hoh Road as cranes and heavy equipment are mobilized to and from the project and construction progresses. ICI will not be working on July 4th.

Impacts to Traffic

- Travelers can expect Temporary Traffic Control Flaggers and or signals between MP 7 and MP 8 of Upper Hoh Rd
- Expect delays up to a total of 30 minutes per passage through the project corridor Monday through Friday from 8AM-5PM
- Olympic National Park and businesses along Upper Hoh Road
