Fixed Completion Date:

May 26, 2023

**Lake McDonald Utility Relocation
Construction Activities & Upcoming Work**

Project Description:

This project is being administered by the Federal Highway Administration’s Western Federal Lands Highway Division, in partnership with Glacier National Park. The project will replace the existing Sewer Force Main (SFM), electric, and communication utilities between the lift station at Lake McDonald Lodge and the lift station at Apgar. The project also includes the demolition and replacement of the lift station at Lake McDonald Lodge along with making modifications at the Sprague Creek Campground and Apgar lift station.

Surface Conditions:

The current road conditions between Apgar and Lake McDonald Lodge is mainly pavement. Roughly 7200 ln ft of the west bound lane between Sprague Creek and Apgar has a strip of milled asphalt that has been recompacted, and will remain in place for the duration of the project where the new SFM was installed. Vehicles, motorcycles, and bicycles use extreme caution when traveling through these sections.

Current and Upcoming Work:

Ceccanti will continue installing new SFM between Sprague Creek and Apgar along with installing pumpout vaults and air release valves along the section of SFM between the hours of 10pm and 6am.

Traffic Delays:

The road between Apgar and Sprague Creek Campground will be closed to traffic between 10pm and 6am. There is a window at midnight to allow traffic waiting at the closure points to travel through the project.

***The Storm Water Pollution Prevention Plan (SWPPP) for this project is available for viewing at the Project Office of the Contractor at the West Ballfield. See SWPPP information posted at the Construction Info Turnout past the West Entrance Station.**
