## Construction Activities & Upcoming Work

This past week Inland Crane, Inc. (ICI) mobilized to the project site and construction started for the Stoddard Bridge project for the 2025 season. Work on Abutment 1 Anchor Block locations is in full swing. The contractor is preparing concrete construction joints, placing rebar, and doing site clean up from the elements of winter.

In the coming weeks ICI will complete the Abutment 1 Anchor Block concrete placement. Work will continue on Abutment 1 to prepare for the drilling of the Ground Anchors.

The Salmon River Road will continue to be a single lane thru the project site and at the crane tower. The speed limit continues to be 15 mph thru this area during the 2025 Construction Season.

**Please Use Caution** when traveling and be aware of oncoming traffic, during day, night, weekdays, and weekends. Thank you for your cooperation and understanding.
