Construction Activities & Upcoming Work

Inland Crane, Inc. (ICI) is continuing with placing and tying reinforcing steel, and setting forms for the next concrete pour at Abutment 1, which includes the anchor block vaults, the saddle rocker bearing plates, wing walls and ties the anchor blocks together. This concrete pour is currently planned for the coming week.

Once the concrete pour is complete, work will continue on tying additional reinforcing steel and setting forms for additional concrete pours at Abutment 1.

Please Use Caution when traveling and be aware of oncoming traffic, during day, night, weekdays, and weekends. It continues to be a single traffic lane through the construction site at the Crane Tower. Concrete barriers has been installed to protect the traveling public and the project site. The speed limit continues to be 15mph thru this area during the 2025 Construction Season.
