Construction Activities & Upcoming Work

Inland Crane, Inc. (ICI) poured concrete again this week at Abutment 1. This included two pours completing the soil nail wall facing and Abutment 1 concrete.

ICI will continue with placing and tying reinforcing steel, and setting forms for the last small pour at Abutment 2. This concrete pour is currently planned for later next week.

Tower erection is scheduled to begin next week as well. **Once the Tower erection starts there could be short traffic delays of up to 20 minutes**, to pick the tower pieces from the transport and set into place.

Please Use Caution when traveling and be aware of oncoming traffic, during day, night, weekdays, and weekends. It continues to be a single traffic lane through the construction site at the Crane Tower. Concrete barriers has been installed to protect the traveling public and the project site. The speed limit continues to be 15 mph thru this area during the 2025 Construction Season. Thank you for your cooperation and understanding.
